

Please do not implement any proposal that would lessen Indiana's Telephone privacy Law protection!! I used to get as many as 3 or 4 calls a day, now I don't get any!! It is wonderful, and I think every person in this great country should have the same chance that our law makers in Indiana have given us. I don't feel that what I already have should be compromised to make this national. Please, please do not override what Indiana has done.
